

Automation Devices, Inc.

INSTRUCTIONS FOR SWAN-MATIC VARIABLE SPEED MODEL 60VS CAPPER

The variable speed cappers are set up following the instructions supplied in this envelope from Bulletin No. SM001IN.

On the motor controller is a speed control knob which will allow adjustment of the RPM. The RPM will change the rate at which the machine will oscillate and rotate. At the full clockwise position, the capper will cycle at approximately 57 strokes per minute.
